« Claire Clavel started her wine journey when she was 12 years old. She was already pouring and selling wine at her family's tasting room during the summer holidays. After getting a degree in business and management, she became the estate's vigneronne and made it her mission to bottle and sell its entire production. Ten years later, after rebranding the cuvées and expanding across France, Claire Clavel has successfully transformed a locally focused family domaine into a business with top-scoring bottles and an international presence. »
